

THARVA

OUR STORY

Tharva Tech has been present in the area of technology and the financial market for over 5 years, offering advanced and innovative solutions for individual investors, funds and companies, with the aim of optimizing results and maximizing profits with security and adequate risk management. .

We are a technology company based in the United Arab Emirates. We have a group of highly trained and qualified professionals with more than 10 years of experience in the field.

Tharva's history has been growing and evolving positively with investments in new projects, training and the participation of renowned professionals. Today it is a young, modern and innovative company, prepared to serve and provide the best possible results.

Previously, operational strategies were only made manually, but with the evolution of the technological world and the concern to present the best strategies, we developed Trading Software and Probability Algorithms combined with machine learning and Artificial Intelligence so that operations became fully automated, profitable and without emotions involved.

The market has evolved and so have we. The priority is to look for new things, keep up with the market and offer our customers the best innovations and advances.

FOREX MARKET

The Forex market is the largest financial market in the world, transacting more than 6 trillion dollars in foreign exchange transactions daily.

In it, participants buy and sell currency pairs, commodities and indices from around the world, with the aim of profiting from changes in exchange rates and price fluctuations.

Financial institutions such as banks, brokers, investment funds and multinational companies actively operate in this market. Some of the major players include JPMorgan Chase, Citigroup, Barclays, Deutsche Bank, UBS and HSBC. Additionally, individual investors also have access to the Forex market through online brokers.

In short, the Forex market offers ample trading opportunities due to its size, liquidity and volatility. With the participation of several institutions and individual investors, this market continues to grow and offer profit possibilities for those who operate the world's main assets.

TRADING AND ALGORITHM SOFTWARE

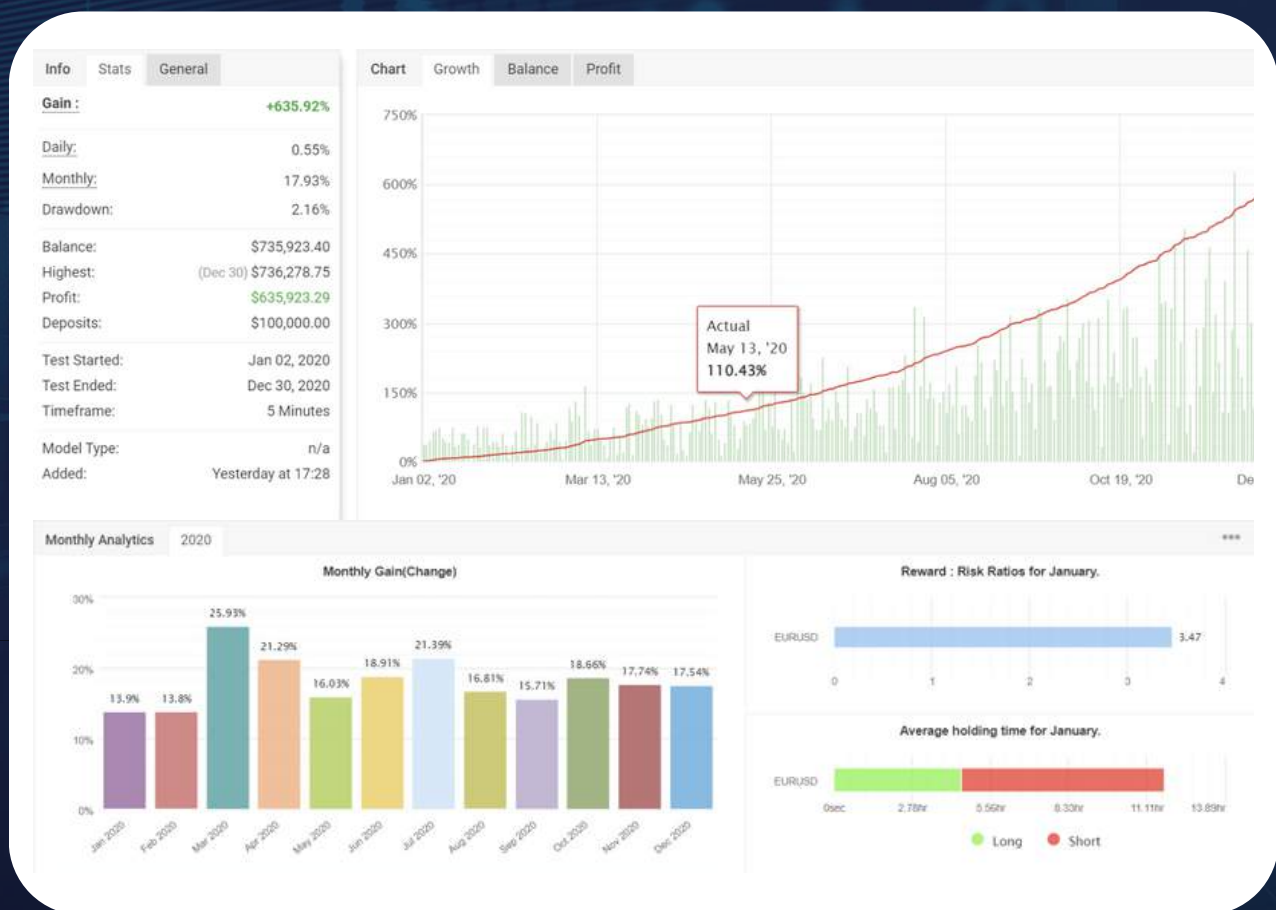

Our trading software uses as a reference what banks and large financial institutions have been doing for a few decades, aiming to obtain profits with low exposure and lower risk.

STRATEGIES

Today we can prove the effectiveness of our strategies, highlighting the results of profitability, consistency, exposure and management since 2020, based on the results obtained through the implementation of our strategies in real market circumstances and after carrying out hundreds of retroactive tests.

OUR SERVICE

Our company offers technology and operational management. When using our service, the client will open an investment account in their own name with one of the partner brokers, having full control of their capital.

After opening the account, the customer will be able to transfer the desired funds for the operation, sharing the performance obtained through our technology. Users of our system can monitor all operations and manage their account from anywhere and at their convenience.

We emphasize that the division of the performance fee varies according to the broker where the account is created. We do not have exclusive affiliation with any broker. Our focus is to provide technology so that clients can trade in the market using our expertise.

TRANSPARENCY AND SECURITY

Tharva Tech will never request money or receive investments into your account. We are not an investment company, but rather specialize in developing technology to operate in the Forex market. Once the technology is connected to the customer's account, all operations will be carried out automatically, without the need for any manual intervention. Clients can monitor the results of operations in real time through the broker's website, staying up to date on all movements and operations executed.

DISCLAIMER

Tharva Tech, license number DSO-FZCO-30103, is a technology company and is exempt from liability for damages suffered by its customers, due to failure in services provided by third parties or losses resulting from operations carried out in variable income.

However, please note that every operation carried out in variable income involves risks and does not guarantee fixed returns, even if the past history is extremely favorable.
